This is very difficult for our family, but it's what is best. We have a male Akita that we got as a puppy. He isn't neutered, but will be prior to being rehomed. He is current on all vaccinations, including kennel cough vaccine. He was raised in our home with our other dogs, and our toddler. We recently had a new baby and he doesn't seem too happy. He has started growling at our toddler and has attacked our small dog. We are worried about him hurting our children and our dog of 11 years. This is why we must rehome him to someone that has NO KIDS, and preferably him being an only dog. We are asking a rehoming.
