Dear Mandarin Chinese Learners:

I am a Mandarin Chinese native speaker, currently a Teaching English as Second Language PhD student, having been teaching Chinese for more than 10 years! I teach Chinese in a more American way, which is more understandable particularly for a language much different than English!

My mission is to help Chinese Learners from all ages and levels to be confident and fluent in Mandarin Chinese, in a more effective and less frustrated way! I teach all four skills: speaking, listening, reading and writing depending on your learning goals. The levels I am teaching are from beginner, intermediate to advanced. I believe the second language acquisition theories I've learned and the experience I've had will both help the learning of Chinese more effectively and less frustrated!

The Rate is $20/ hour. First Class is FREE!
