QR Code Link to This Post Can test for just about any parameter of concern. Might want to test to see if your Britta filter is removing enough chlorine or fluoride, if there is lead in paint peeling from your wall, fecal coliform contamination in the well water that you're using at you're hunting property. Etc. over 20 years of analytical lab and field sampling experience. Feel free to contact me with any concerns you may have and if I cant help you I can probably point you in the right direction(for any analytical needs).
