Need to rehome my bearded dragon as I don't have time for him anymore between work and spending time with my kids. A bearded dragon is among the easiest to take care of they aren't really demanding all you have to do is give them veggies and either crickets or super worms he's about 6 years old and can live up to 15 years if cared for properly everything in the photos comes with him. I'm asking 150 it cost more than that to set up an enclosure for him and he is very sweet and loves attention I even let my kids hold him so he doesn't bite but he might lick
