APHA Breeders Trust Foal

May 5, 2014 Black & White Colt

This gorgeous and classy black and white colt will get you noticed in the show ring! Scooter should mature to 15+ hands and is just a paint lover's dream! His loud markings and paw prints stand out against his white spots and to top it off he has that perfect blaze! He is going to turn heads wherever he goes, he is just the whole package. Scooter should make a fantastic all-around performance horse prospect and once you are done showing he is bound to produce outstanding foals to continue on! I started his mom and she was a breeze to train with no buck. Nothing fazed her as if she was already started. I am sure Scooter will be the same!

He has not yet been color tested but his black/white dam is Double Homozygous for Tobiano and Black and his black/white sire is Homozygous for Tobiano. That means Scooter is Homozygous for spots as well as having a high chance of being Homozygous for Black!

May Consider Partial or Full Trades for Panels, a Truck, Bully Barn/Shed, or?
