Guitar Lessons

YOU WILL SEE TANGIBLE RESULTS IN THE FIRST HOUR AND LEARN NEW THING TO APPLY TO YOUR PLAYING

check out my website--there are over 50 videos and mp3's of live performances posted there

Lessons can be in my studio or in Skype

Lessons are still \$35 an hour, and scheduling is extremely flexible.

Work on picking and speed and most importantly touch and feel.

Learn to play in rhythm, with a metronome.

Learn to read song charts, and notation and tab.

Learn to work on speed, strength, stamina, play songs you like all the way from beginning to end.

Some students pay in advance, but I can also work with students on a pay as you go basis as well,

Learn about effects and recording software, amps and songbooks.

I don't just show you songs, I teach you to teach yourself and begin to become musically independent.

Almost all of my students learn bar chords and how to use them in songs they want to play in the first hour of lesson time.

Almost all of my students begin in the first lesson with songs like Little Wing and Georgia On My Mind, and Stairway To Heaven, with the right chords in sheet music form. Once you learn how to do that you can begin to take yourself through songbooks, if you learn how to use the printed music, there is a vast amount of it available everywhere.

Almost all of my students are reading melodies using real notation by the 4th or 5th lesson. Reading melodies they like and want to play. Although my students know how to use tab, Notation is the best way and they all prefer it, once they know the difference. Like the Stairway To Heaven Solo, or any of the beautiful Spanish melodies from J.Rodrigo, or blues , jazz, rock and roll, once you can read, you can read anything in print on your own.

All of my students learn rhythm skills playing scales and songs with a metronome, so you learn how to play in time, as you develop stronger rhythm skills you can play better alone or with other people.

All of my students learn the Music Theory. What Time Signatures are and mean, Scales and scale harmonization. Chord progressions and playing through the chord changes.

All of these and more are the fundamentals you will begin to work on in the first 4-5 hours of lessons with me.

You WILL see tangible results in the first hour.

I can help you with learning songs and learning to teach yourself. If your just starting you'll get to play music you like in the first lesson.

If your already a player I can most definitely help you get to the next level.
