Our writing company is looking for FT writers who have English as their first language, and a solid mastery of the language. Experience preferred, but willing to work with those who are willing to learn. We need writers that are going to be responsive when emails are sent asking about projects, and we need people who are actually going to turn work in on time. We have many different types of projects to dole out each week, from blogs and articles to press releases and white papers. Please let us know what type of experience you have in your response.

We pay out weekly via PayPal, for any projects that have been accepted and paid out by our clients. We have a NET30 policy, meaning the clients have up to 30 days from acceptance to pay out, but most pay in much less time than that. NDA is required to work with us, and our rates vary. Large bulk orders can be as low as 1.5 cents per word, but established clients pay up to 4 cents per word. If you want serious consideration, please let us know that you read the entire post by putting the sum of two plus three in your subject line, and by including your resume in the email to us.

If you have any questions, please let us know and we'll be sure to respond promptly. We look forward to hearing from!
