

2005 polaris IQR 440 chassis. It has a 2003 polaris 700 ves motor installed in it with 1300 miles with great compression. Sled itself is in pretty good shape. Has a couple minor flaws but tunnel and bulkhead Are straight.

New parts/maintenance:
Installed new reeds
Cleaned carburetors
Hood has just been freshly painted white
Hood vents made for it.

One of the things I noticed when the surveyors and the highway owner did our test wrap on the bridge and/or melt spot on the side panel was since we wrapped the wax coating and it is too hot for the temp gauge we got melted and I'm always on the road it for 200 miles and the highway owner said I never melted for him ever.

2000
