these guys are with junebugs rescue who is pending 501

update he is now neutered and microchipped, all shots hw negative and will come with a leash and collar and he is ready to go

I run a rescue for mostly small dogs and medium sized dogs. I found Boudreax on the way to the shelter a few days ago covered in dog fight wounds and an abscess on his neck. I could not bring him to the shelter because he would be put down cause he needed medical treatment. I took him to a vet who boarded him for the night and has treated him for fleas/ticks yes he had both and was covered in fleas, treated him for hook and whip worms and I also now have him on a grain free diet. this poor boy was not taken care of at all. he is the sweetest dog and great with kids, kennel trained, and loves to ride in the car. he seems ok with other dogs but I want to do a meet and greet with any other dog in the house to make sure everyone gets along. he is a year old and weighs 40 pounds

first picture was the day I got him and the second was taken yesterday and as you can see only 48 hours on meds and the swelling is already gone down.

he has had all his shots, hw negative and he will be neutered and microchipped on the 26th that is the day he can come home with you not before that is done

I don't have the facilities to house him so I am paying a \$100 a week to board him til he finds a home.

and his first vet visit was \$143
