I have a class 5 baja for sale or trade. It has a turbo 2.0 subaru in it. A full chrome moly tube chassis. Car is a blast to drive and fast. It is the same length as a 4 seat side by side, a little wider wheel stance and not much heavier with a lot more horse power. Give me call and I can give you all the details on the car. I do have a clean title and it is street legal. I would be interested in trading for a nice vehicle preferably a diesel pickup of at least equal value. I am open to offers as well but be respectful as I have way more in to it than what I am
