Have an AWD auto trany out of a 97 Ford Explorer, Eddie Bauer edition.

Includes a used torque converter.

If you need one of these, you know how hard they are to find.

Swapped this out when it felt like it was starting to slip. Replaced with another unit. Then found out my front diff was bad. So, not sure if it needs a rebuild now, or what.

But- cheap- selling for the core price.

Just in the way- need a new home.

Email a phone number for a.
