Hey so sadly i am moving and can not take larry my pet lobster with me. He is salt water, tame eats shrimp and fish and fish food and loves fruit and veggies as treats on occasion. He is very sweet boy. I had him since he was a baby. I saved him from being eaten so if your serious about owning larry as a pet not to eat please contact me. He will come with cage, stand, his favorite rubber duck and some food. I can tell you more about him and his care when we meet up. I am seeking a small rehoming fee due the fact I do take him to the vet and have purchased him a nice cage and things for his cage. And also so i know you wont eat larry. Thanks serious people
