

Therefore, for some folks, albeit a small percentage, the Pennsylvania Criminal Justice System is an Injustice System. This post is about a member of that small group of innocents, that small percentage, for whom the Pennsylvania Criminal Justice System is an Injustice System. He comes here before you to ask for your support in his effort to obtain his freedom.

By the process of elimination or simply profiling, I conclude that you stand for justice, equality and freedom. The issue of the injustices that exist in our society are not new to you. You have confronted these issues before. You feel empathy for people as they struggle with life's challenges, and you are, have been or will be part of that minority that fights for justice, freedom and equality.
