

Custom desktop PC (3.3,4 USD)

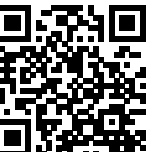

Location **Tennessee**
<https://www.genclassifieds.com/x-317729-z>

I am selling a custom-built desktop PC. I built and tested it myself, and everything is in good working condition. Most of the parts are a year to two years old. This would make an excellent general-purpose computer, and could even be a decent gaming PC with the addition of a new video card.

Here are the full machine specs:

- Intel Core i3-3220 3.3GHz CPU (stock cooler)
- Asus P8H61-M LX Plus R2.0 motherboard
- 4GB generic DDR3 RAM
- AMD Radeon HD 8570 video card (not pictured, installed after photos were taken)
- 160 GB HDD
- DVD/CD reader & writer
- Corsair CX500 power supply
- Rosewill FBM-01 case
- Windows 8.1 Pro (64-bit)

Photos are attached. This does NOT include a monitor, keyboard, mouse, or other peripherals. Serious inquires only, please! Once again, the system is in perfect working condition right now, but I will be unable to provide any tech support after.
