

# Alpacas in need of a new home

Location **Wyoming**  
<https://www.genclassifieds.com/x-374032-z>

Meet our alpacas. There are five right now but our mama is pregnant and is due in late May, early June. We have a total of three males and two females. All of them are registered in the alpaca registry. They are good for breeding or for their hair. We are looking for a new home for them. We are asking for a rehoming fee. Please let me know if you are.
