We are a small but growing Skate Apparel Company based online only, but live and work in the Tampa bay Area. We are looking for a Skateboarding Video Editor/After Effects gig for possible long term. Heres what we need from someone: 1. Advanced After Effects knowledge. 2. Its a plus if you have previous experience producing/editing skateboarding footage. 3. Knowledge of the skateboard industry, culture and competitor brands.

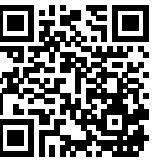

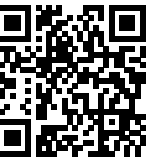

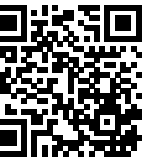

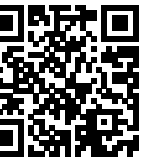

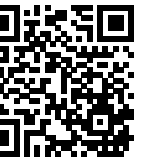

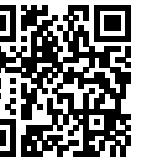

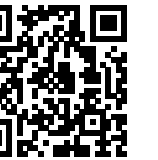

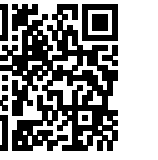

If you are interested in this gig, please shoot us an email as well as examples of any other skate vids you have put together in the past.

We have a little teaser we've put together so far, we are not video editors so its not too great. You can view it here: <https://youtu.be/7gvsylzS3eM>

We are looking to launch our full length video (:30) for our team rider Samson Hussey this coming summer so time is of the essence.
