

# Code Bootcamp (8 USD)

Location **South Dakota**  
<https://www.genclassifieds.com/x-378268-z>

Code Bootcamp is all about building strong web developers with a focus on user-interface (UI)/user experience (UX) skills. We do this over an intense eight week course that goes well beyond building just the technical skills of being a developer. Our curriculum fuses a combination of traditional educational approaches with team based, hands-on learning and a comprehensive mentorship program.

The Code Bootcamp curriculum will focus on the Web development skills used in our region and will include a thorough understanding of PHP, LAMP stack, Content Management Systems (to include Wordpress), HTML5, CSS3, JSON, XML, AJAX, JavaScript, JQuery, Bootstrap, responsive design and the backend services which make the Web work today. We will also spend time with mobile development, security, e-commerce, compliance and ethics.

The full course curriculum can be found at <http://www.sdcodebootcamp.com/#curriculum>

Are you ready to start a new career as a developer?

The entire eight week costs only \$3,997 and is limited to 15 students. Applications deadline is May 1st, 2015 with classes starting May 26th, don't wait until it is too late to apply. (This is our inaugural course cost and it will never be this low again, so sign up today!)
