Hello, I'm Stephen Carrington; I have been playing guitar since 1987, and I am ready to teach you! I specialize in rock and blues, but I also teach metal, country, pop, and anything in between.

Check out my website <http://www.StephensGuitarLessons.com> or call (this is my home number, so please: no calls or texts between 10PM and 9AM; thanks for your cooperation with this) to set up a FREE introductory one-hour guitar lesson...and parents, please note: my studio, as well as my instructional approach, is suitable for young people; middle school and high school are great times for students to learn these skills, so if your child is interested in guitar, give me a call to set up an intro lesson!

My studio is in East Cobb/Marietta (very convenient to I-75 and other main roads). Please see my website [StephensGuitarLessons.com](http://www.StephensGuitarLessons.com) for important lesson-related details.

I give every student a personalized, one-on-one lesson, focusing on what they need to do to achieve whatever musical goals they have for themselves. I don't schedule lesson back-to-back, but always with at least a 15 minute "buffer" period between lessons; that way I can properly finish any lesson, even if the student is having an epiphany right when the scheduled lesson time is up, and still be able to properly prepare for the next lesson. I concentrate on each student and their individual progress, not on getting one student out the door so I can get the next one in.

I enjoy teaching students as well as playing guitar packs and instruments; but I also have hobbies like social specials and even bigger discounts. Check my website (<http://www.StephensGuitarLessons.com>) for the latest deals. In the near future I will also be offering lesson packages that focus on skills and techniques for specific playing styles geared towards beginner; give me a call or check my website for more info as those become available.
