

RAIN GARDENS DESIGNCONSULTINGINSTALL (MN)

Location **Minnesota**
<https://www.genclassifieds.com/x-379959-z>

We want to become your one stop company for all your rain gardens and native plant needs.

Our designer has designed and consulted on hundreds of rain gardens and community wide rain garden projects. He has taught hundreds of people how to install their own rain gardens. Now he is training and helping make our crew the best with native plants and rain gardens around.

We are eager to get you the rain garden and native plant landscape of your dreams. All designs are hand drawn to scale with complete plant and materials list. We know most of the main native plant suppliers in the area so we won't use anything we can't help you get.

In a 1-2 hour consultation we can help you select a site for your rain garden, plants and design as well as explain to you how to.

Our design, consulting and install work area ranges all over Minnesota and Wisconsin. We will happily help with landscaping needs at your cabin or lake place.

References available upon request. Don't hire from Craigslist without first checking.
