selling my JBL P1224 12" sub. dual 4ohm 3" voice coils. these are rated at 400watts RMS per coil or 800watts RMS for both. I ran it for a few years responsibly on 340watts from a soundstream 5 channel amp and it sounded great. these are amazingly efficient SQ subs that compare to the JL w6 series in output in the right box! asking \$150 firm. located in grand.
