Fund your own project while making a small (\$50 to \$200) contribution to the person who introduces you to the crowdfunding platform. With that access, you get a vehicle to fund your project. People make same small contribution to your project as you introduce them to the platform. And so on. Very popular way of funding projects in this modern era.

This is compounding exponential growth. The give you an example of how powerful compounding exponential growth is, ponder this: the moon is 240,000 miles away, if it were possible to fold a napkin until it was thick enough to reach the moon, at what fold would it reach the moon? Fold #32.

My project is a non-profit animal sanctuary. What's yours? You succeed by helping others.
