I have a 2005 yamaha r1 motorcycle, has a 6" stretch and lowered 2 1/2 ", chrome rear wheel, has 8k hids high and low, has shorty levers, just put on a brand new metzeler rear tire on the bike in May has maybe a couple miles on it, The bike has 22,000 miles on it. the bike does have a repair title (it had some cosmetic damage but you would never know some fairings were replaced the bike looks sweet gets alot of attention). This bike has lots of extras like braided rear brake line, newer chain and sprockets, It has intergrated smoked tail light and flush mount blinkers. This is a fast bike I have had cbr 1000rr gsxr 1000, and zx10r even a hayabusa and this bike as fast or faster handles great with the stretch.

I have to have 4400.00 for it or I will just keep it and run it this is not a money issue I got the bike for a family member and they did not finish paying me for it or maybe trade for a mustang gt or muscle car of equal value or I will pay extra for a nice car. I am in no rush to sell this bike I am willing to wait for a good trade so no projects, no junk please this is a nice bike the trade needs to be a worth at least 4400.00 real world value NOT personal value or NOT book value thanks. MY R 1 looks mean all black and it has a modified exhaust sounds nasty. I have a brand new blacked out helmet lg I will through in with the bike for my full price(207)-459-six-four-seven....
