Someone has either abandoned or is severely neglecting their cat. It seems to be living in the tenant parking lot of the Dorchester Apartments. It's constantly sleeping in the middle of the pavement, is rail thin and has several bites from other cats. Tonight I gave it a pat and it has an abscess nearly the size of my fist near the base of its tail. It's hot to the touch and clearly very painful. How do I help this animal without knowing which one of my neighbors is the?
