Thinking about selling my beautiful, high quality Custom Guitar built by Tommy Rodriguez in June of 2008,,,(SN# 127). Many of you guitar players in the Richmond metro area likely know of Tommy and the superb guitars that he has been building for over 20 years< If you are not aware, Tommy is one of the best luthiers on the east coast, if not in the U.S. of A! His guitars stand well above any factory built guitar, in both quality of workmanship, high quality woods, top of the line components and playability...I had the pleasure of watching this guitar being built in 2008, and. i was able to take photos in his shop during the build ! This is one of the best electrics he ever built! The price i've placed on it is reasonable, considering that it was only played ONCE, by a local guitar repairman who has ordered one identical to mine,,And has waited for almost two years for completion,,Mine is readily available to a cash buyer who appreciates this unique guitar,,! I don't have to sell and scammers and out-of-the-country wackos need not respond,,I'm in the Lynchburg area but will drive halfway to meet a prospective buyer,,, ,,The guitar is a "thin line" style of Tommy's own design. Tuners are GOTOH Delta Series Gold plated. The bridge is a Wilkerson Wrap Around that is also gold plated,,Pick ups are custom wound by Lindy Fralin. ..they are P-92 split style that are wound to sound like old soap bar pickups. Body is walnut, top is book matched spalted maple, Fret board and pick guard are Striped ebony, binding is 3 ply, neck is laminated walnut & maple for maximum strength and longevity with no chance of warpage,,,The neck is set deeper into the body than most electrics, for strength and durability...The case is custom built for this guitar by Cabin Creek and is plush lined..
