Up for sale or trade is a nice 1990 Ford Festiva. This has a fuel injected 1.3L FI SOHC 4cyl and 5 speed transmission. I just had the speedometer replaced because the original broke, new CV axles both sides, new water pump, timing belt, tensioner, a true fuel injection flush from the tank line to the engine with Ford injector cleaner. It has just had an alignment at Les Schwab's. The tires are at 95% and has plenty of tread left on them. This is a base model but someone had a roll back rag top installed and it works great and has no tears. It has an AM-FM cassette player and the heat and defroster works fine. The headliner needs to be redone as its coming apart in some areas and the windshield has a crack in it. There is ZERO rust on this vehicle. The car starts up first time every time and runs great. Doesn't leak any fluids and it's pretty rare to find one this straight. There is a crease on the driver's side where it looks like someone rubbed a pole or something but because of the color of the car and it not being a massive dent its not to noticeable. This car is very reliable and has no issues just get in and drive. It gets roughly 34mpg on hwy and in city.

WOULD CONSIDER A TRADE STRAIGHT ACROSS FOR A LICENSED AND ROAD WORTHY ENDURO.
