

REWARD for Info Leading to Return of GRAYWHITE TABBY CAT (walnut creek)

Location **California**
<https://www.genclassifieds.com/x-442371-z>

My missing boy-cat is a large, short-haired, neutered "tuxedo tabby" cat -- gray with dark markings and white paws, a white chin, and a white chest (white "bib") and white stomach -- but from the sides or above, he looks mainly gray. Unlike many tabbies, the end of his nose is a pale pink (and the fur above it is white).

- Distinctive features:
- large size
 - green eyes
 - pink nose
 - "tuxedo tabby" markings
 - shyness; he's a somewhat wary cat; can be skittish

Last seen in 2600 block of Jones Road, Walnut Creek, but he could be much farther away by now, since he's been missing since Christmas night. Or he could be trapped inside someone's garage, shed, or storage unit.

I am offering a \$200 reward for his safe return. Alternatively, I am offering some compensation for any reliable proof of his whereabouts or condition, good or bad. It's also possible that he's been adopted by someone after being mistaken for a feral, neglected or abandoned cat after being lost and surviving on

his own outside for months now. I am desperate to know what has happened to him, good, bad or otherwise. I have had a lot of time since he was last seen, and I really miss him.

PLEASE PHONE CALL OR VISIT AT SIGNATURE RESTAURANT AND SEFU...
 I will reward him. Instead, please a photo with a caption on which a reward be you

can be reached by phone, text or email. Thanks for reading and to any tips or help suggested by you
 can offer.
 (And, of course, please feel free to share any and all of this information with others who might be able to help keep an eye out or offer tips. Thanks!

UPDATE: POSSIBLE sighting by a resident of Shady Lane, off Walden/Jones, in Walnut Creek on Feb. 27 and by a resident of Carriage Place on Oak/Jones since then. Two or three tabby cats similar to mine have been seen on Jones Place; on Walden near Jones; around via los Ninos; in the Northwoods complex on Jones; and near Cora and Cherry in Walnut Creek, but they're a bit smaller than my big-boy. At least a couple of those cats have gray noses, rather than a pink nose, like my cat. At least one of those cats has more white on its upper body and sides than my cat, who appears mainly GRAY -- with black striping -- from the sides. There's also a smaller tabby cat (with a blue collar?) that lives in the Hamptons complex on Oak. There's a more tiger-ish tabby cat who frequents the Contra Costa Canal Trail bushes near the Walden Park at dusk.
