Sparks was probably the most underated band of all time and I need the following musicians to step up and make this vital tribute happen for the coast scene and the world. I need several multi octave singers, a real drummer, a drum programmer, a bongoist, a bass player that has more strings than a guitarist, a dozen guitarist (coz ya no ones gonns quit), as many keyboards and synthesizers we can find coz they are the only instrument that really makes a pure sound and can replicate every other instrument on the stage, a gong masher, a psychopath and a few morons....that should be enough to get started. You MUST be able to practice every night of the week for an undetermined length of time for an unspecified goal and you better be good with an impromptu blurs jam, coz Sparks was the best blues band ever.

I am a real professional with pro gear and pro attitude....well...not really...I'm an sob with a cheap amp and nasty acoustic guitar that smell like cat piss....BUT WE ARE GOING ALL THE WAY MARK MY WORDS ON YA MUTHAS!
