I have a xlarge metal crate I bought last year at the pet swap. Originally bought it for my flemish giant but we rehomed her. I paid a good amount of money for it, now just wanted to find it a home. It has one door in the middle and a small one at the bottom of that door. It had two removable trays, one is crated on the end but still usable. If it needed to be taken apart it would need a Alan wrench. Very sturdy and well made crate. \$75 Please text me for more.
