Guitar pedals - everything tested and functional, see notes below. Prices are pretty firm, I've done the research and they are very fair. I am happy to knock off a few bucks if you buy more than one item.

Electro-Harmonix Nano Big Muff \$50
 like new in box

TC Electronic Corona Chorus \$80
 like new in box

Korg Pandora PX4B personal multi effects (for bass) \$80
 Great for headphone practicing, guitar or bass, runs on 4 AAA batteries

DOD FX20 Phasor \$60
 Vintage 80's era, great sounding phaser pedal - works fine but LED light is always on even when effect is off. Still sounds pretty cool!

Boss CE-2 Chorus \$125
 Vintage 80's era, classic analog sound, made in Japan, green label - works fine but can only be powered by 9v battery or adapter using battery clip (AC power jack does not work)

Carvin AB-1 footswitch \$10
 no AC power
