Identity theft is on the rise. Neighborhood Parcel's Private US Mailboxes provide a secure alternative to having mail delivered to your home or business. International customers and businesses can now establish their own dedicated US address through the rental of a US Mailbox. This is not a PO Box address. We provide you with a genuine US street address and your own PMB (private mailbox number). You can get a Mailbox with a real US street address and secure access to your US mail and package deliveries.
