we have here a great set of 1 yo s10 projector headlights. these have the glow rings. they look like they would have some LED's but there is no wires for them. they work great and i even throw in the smoked park lites as well. i will trow in a set of tail light lens that i masked off and painted satin black, they look pretty good, and unlike painting them smoked, these you can see when you have the lights on. the price is FIRM \$60.00
