

Vox AD30VT Amp (200 USD)

Location **Florida**
<https://www.genclassifieds.com/x-501681-z>

For sale is a barely used Vox Valvetronix 30 watt amp. A little dusty but in excellent condition, no rips, tears, or visible markings. Received as a gift years ago and has barely 5 hours playing time on it. This is a modeling amp with several different amp voices available (marshall, AC30, Numetal, US high gain, etc...) and several effects as well (tremolo, reverb, auto-wah). If you can't get the sound you want out of this amp, then you aren't trying hard enough. It takes pedals extremely well, and my favorite feature is the power level setting on the rear, which allows settings from the full 30 watts down to 1 watt. This not only makes it more friendly for smaller spaces, but allows the breakup of the sound at lower levels. And finally, it has the ability to store whatever settings you create so you don't have to start over every time you turn it on. If you need more info just google this amp; there are plenty of online reviews as this is a very popular amp. Asking \$200, which for the condition is very fair. I do not really have a need to sell other than wanting to purchase different equipment to fulfill my musical ADD, so no scammers, trades, or any other crazy shenanigans. If the ad is up, it's...
