If posted, then STILL for sale.. No scammers, dealers please.

==== Following is information I found describing the newer moissanite =====

Introducing Forever Brilliant Moissanite Created by Charles and Colvard. Moissanite Created by Charles and Colvard is a stunning new jewel created in the lab, that has fire,

brilliance, luster and incredible hardness unlike any jewel you have ever seen. They are rapidly becoming the most popular gemstone in the jewelry and watchmaking world. Moissanite is a synthetic gemstone that is chemically identical to natural moissanite. It is created in a laboratory using a process called Chemical Vapor Deposition (CVD). Moissanite is a colorless, clear gemstone that is cut to resemble a diamond. It is a very hard gemstone, with a Mohs hardness of 9.25, making it one of the hardest gemstones available. Moissanite is also a very durable gemstone, with a high refractive index and a high dispersion, which gives it a unique fire and brilliance. Moissanite is a very popular choice for engagement rings, wedding bands, and other fine jewelry. It is a great alternative to natural diamonds, as it is more affordable and has a similar appearance. Moissanite is also a very ethical choice, as it is not mined and does not have the same environmental and social issues associated with natural diamonds. Moissanite is a beautiful and durable gemstone that is a great choice for anyone looking for a stunning and affordable jewel.
