Bass player needed by lead guitarist and drummer for original hard rock band playing some covers. The originals are heavy, some dark melodic, some high energy. We play in a hard and heavy style, but also turn to a darker more melodic style for some of the songs. Some, but not all of our influences include: Metallica, Sabbath, Slayer, Pantera, Godsmack, etc... We have a core list of originals written and recorded well enough for learning the set list. We are writing new material and looking for collaboration, there is definitely opportunity here if you are looking to participate in the creative process as things progress.

We have extensive experience recording and playing live. We are forming this band with the intent of rehearsing mainly one x per week, if you do your homework that should be all that's needed until it's time to prep for a gig. We expect to record with a full band in the next few months, but we won't rush the recruiting or creative process, since we want the right players who will demonstrate commitment, and have the right attitude. In other words, we are ready - when we are ready, and it's done - when it's done. We have a serious work ethic, and expect the same from our band members. We take this project seriously, but we do enjoy ourselves, after all that's what it's all about right? We have day jobs and keep things in perspective; however, this project has potential and we are willing to take it as far as it will go. We are on the ride to see how far it will take us!

If you are interested, please send us some basic information about yourself; experience, years playing, contact info, any links or samples of your playing and what you are looking for in a band. We look forward

to hearing from you - Thanks
