Private Investor Needed

We are the founders of a construction business that is in demand in our industry on most project sites. We have been in the business for enough years to have built an elite team with a winning operation that works. We are not struggling to gain new clients for our business. In fact our position is widely based on the overwhelming acceptance of our business model and how it helps others.

We are open, honest, and willing to listen to your offers. We know exactly what we are looking for in our search for the right private investor. The truth is there is plenty of money out there. Working with us will take integrity, honesty and the willingness to help others.

We want a strategic partner that can add value to our business. We require \$150K for no longer than 6 months with a 7% return on investment all guaranteed with public contracts.

Finding an investor isn't the problem at all. We have several proposals on the table with more than adequate funding. Business is business and we understand the motives that drive you.

It's been interesting for lack of a better word, to see the predators sweep in with their half-truths, while patiently waiting for their out of touch offers to "help". This isn't about greed or becoming a victim, it's about lifting our business to the levels needed to sustain and thrive while improving our operation advancements.

We are looking for one private investor that will make a better than average return on investment. If that's you, we are waiting for you. We are making a decision in a few days or 2 weeks. If you are the right person, we will contact you.

Here's what we are looking for:

- Independent/Private Investors
- Must have Minimum 150k
- Guaranteed 7% ROI
- Understanding of:
