

Farm Drainage and Excavation

Location **South Dakota**
<https://www.genclassifieds.com/x-503637-z>

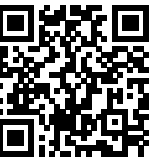

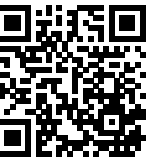

Nelson Ag Drainage, LLC is a company that specializes in drain tiling and excavation. We have been installing tile since 1997 and can design and install any amount or size of tile. All of our work is guaranteed and we offer free estimates and drainage planning. Often times we can get you an estimate within 48 hours. Volume discounts and discounts for In-season(Summer) tiling. We can work with nearly any budget and come up with options that best fit your situation.

What makes us different from other companies?

1. We take a very unique approach to our projects. Technology and the data it produces is our best friend, so naturally we utilize every piece of data we can possibly get. While it is not 100% necessary, we prefer to get some yield maps from the last year or two. We combine this with soil survey data and topography map in our design software to create the absolute best tile system possible. This extra small step WILL save you money!
2. With proper planning, we also have the ability to reverse our tile systems and turn them into subsurface irrigation systems. This takes extensive planning, but the payoff can be huge. Drainage is good, water management is the best!
3. We offer delayed payment options as well as huge discounts for Summer tiling. Our guaranteed estimates will ensure your project gets done within budget.
