American Staffordshire Terrier puppies available to a good home.

They go home with AKC registration application, litter certificate(Pedigree), 2 health certificates and rabies certification, worming and lifelong health records, and a puppy pack with some supplies. They've gone in to see the vet several times and received their full sets of shots (Including rabies) and aced their health exams every time.

They are doing really well with crate training as long as kept on a good schedule. They are fed a high quality kibble and will have some kibble offered when going home. They've been raised up around kids and other pets and socialized around people. They are going to be a great addition to any family ready to raise and groom a puppy into their household.

Bloodlines are 75% Edelhaus and 25% Rogers.

Runt is a very outgoing male. He has a lot of confidence and is very full of himself. He can be a little pushy about getting his way (complaining) but is eager to learn and is very affectionate and sweet.

Red is also an outgoing male with a lot of spunk and confidence. He can be very affectionate at times but prefers an active life with kids to chase and wear out. He has a liver nose and pigment.

Mouse is a female and is beautiful! She is very timid though and is seeking a home that has kids and a devoted person to help bring out her shy side.
