I am looking for:

- A student photographer who wants to participate in a REAL and PROFESSIONAL photoshoot.
- Willing to shoot with OUR equipment and OUR lenses (5d Mark II, L Series lenses)
- Willing to temporarily release rights to your work - I won't be able to let you use any of your work in your portfolio until AFTER I edit your work and tag the edited photos with YOUR information, then you are free to use them in your portfolio. I get to control all of the editing, you can use the edited photos in your portfolio.
- Willing to accept \$150 cash for about 4-5 hours of work

What do you get out of this if you can't even keep all of your own photos? You get \$150 and experience. You will get credit for your work after I edit the shots. You get to see how a real photoshoot is set up, you get to do some directing of the models (this is a family friendly shoot), and you get \$150.

It happens on Sunday morning, July 12, 2015.
