

small parcel of land (out of town)

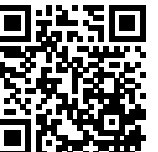

Location **Arkansas**
<https://www.genclassifieds.com/x-566451-z>

Returning to our roots and getting back to basics, we are looking to buy 1 to 5, maybe 10 acres for off grid sustainable living (1000 acres would be real nice). Transplanted from Oregon, we are doing what we can now on a 1/2 acre lot but are in too close proximity to city limits for our liking. Ideally, this property would contain a fresh water spring, no cell phone service, and a sky full of stars at night, set in rolling hills surrounded by densely growing vegetation--a "conservation area" of sorts--it's nice to dream...

Wherever we land, we two stewards will enrich the earth with a lush and bountiful, non-petrochemical garden, abundant with flora and fauna. Fresh nutrient dense produce, poultry (no batteries here!), goats, sheep, etc. Diversity is key!

No financing needed and as an added bonus whomever helps these two starbound explorers, farm fresh bounties will be awarded. :)
