

# Pond Building Experts We Build Them Deeper For Cheaper Dream Ponds (Okc amp All

Location **Oklahoma**  
<https://www.genclassifieds.com/x-568595-z>

I do Land Clearing, Ponds & General Dozer Work. I use large newer equipment that is very efficient and I am good at what I do. I can build you a "Dream Pond" with out the outrageous price. I'm very reasonable and my ponds are always built with the intention to be the pride of your property. I build every pond as if it were my own and I love what I do. Most ponds in Oklahoma average between 4'-8' deep. I build mine to exceed 10' or more with as much volume as possible to out last the droughts we have been known to have every few years although not this year lol. I take pride in every pond I build and im looking for that WOW affect. I'm very creative and depending on the variables of your property I can do some pretty neat things. I grew up fishing in ponds and always thought "who ever builds ponds has the coolest job in the world...Now I have the coolest job in the world...lol. My ponds are always valued at two to three times the value you pay and I go all out on them to give them as much eye appeal as possible. I have the ability to drain existing ponds and give them a complete make over so dramatic that you wont even recognize it afterwards. If you live by a nature water source such as a river or creek, I can even fill your pond up for you & refer you to a local fish farm so you can check out your stocking options. If you own property with live stock and have a small inefficient pond that is silted in or no pond at all, then im your guy. I promise to give you as much pond value as I can in the time allowed and my estimates are free. Joey

(Calls & Text Messages Ok I rarely check).
