Need plans drawn up for an addition to your house/building?

How about a floorplan of your existing house to show to an architect or realtor?

I've been using Autocad for over 25 years now in offices all over the world and I'd like to settle down a bit and work on my own with my own laptop and my own Autocad software.

My software is a legal registered version so there won't be any bugs from someone giving you a drawing made from a pirated version.

I can come to your place, measure everything out and put it all in an Autocad Drawing you can use for anything you want.

I can also help you with fabrication drawings if you're an aspiring inventor or need to send the plans off to have your product manufactured.

Extensive skill with NavisWorks to include Multi-Billion Dollar BIM Coordination on multiple large buildings (Think Intel in Hillsboro, Phoenix, and Dublin, Ireland). I've taught NavisWorks to over 750 users including my own team, the clients, and sub contractors I've worked with. Not just the point and click kind of training but, how it's being used on the project we're working on.
