Hey everyone. We are a small, low budget, independent film crew looking for an actor to play the lead role in our upcoming film. Every other role has already been cast. We are seeking a male actor, preferably between late twenties to late thirties of any ethnicity. The film is a dark, science fiction drama about the slow downfall of a space ship captain who tries to coerce his crew into accompanying him on a dangerous mission to salvage his failing career.

Based on highly positive early response, we predict that the film will act both as a springboard for future, higher budget endeavors and possibly also be entered into the film festival circuit. If any of this sounds like work you'd be interested in, please email us with your headshot, resume, reel, miscellaneous work experience, and any other relevant information. Thank!
