hughes & kettner warp7 combo. this is a german made pro quality two channel amp. clean and warp. two 12" celestion speakers . this thing is a power house. its oversize closed back cabinet sounds more like a halfstack than most open back combos. voiced for detuned metal/nu metal with deep solid clear bottom end and razor sharp highs. I personally use standard tuning and think it sounds great both clean and dirty that way as well. the clean stays pristine clean up to real loud levels and the warp will go from hard rock to thrash /nu metal, for its size it's not ridiculously heavy like you would expect, 57 pounds. the amp is very clean ungigged and in perfect working order. price is firm and cash.
