It's a dual speaker custom made blonde fender styled Champ Deluxe and it only weighs 14.8 pounds. I only want \$375 for it. The kit on tubedepot.com is \$625 and then you have to assemble it. And I then had my tube tech upgrade it even better. It's a Champ Deluxe kit. With \$250 more mods added. Has separate grill for single 10" also. Has a 6" and an 8" in it now. The extra grill is for a single 10", and it has a low and high gain input hence the Deluxe part. My tech hooked up only the 8" right now, but there is a 6" in there too. One is a Fender 6", and a Jensen MOD 8". My Tech says just the 8 sounds better buy itself, and after I got it back from him I never went back to try the other because it's perfect. Great for the person looking to pack light but killer TONE! Also works great as a Harp amp!
