The hungry designer you are looking for would soon be starving taking gigs like yours!! Oh, the old promise of future work, ripping off designers for ages. It's sad that new designers often fall for tactics like yours! Quit being a cheap ass and PAY for the design work you require. Designers, whether seasoned or a noob, are not slaves. Good designers and developers spend thousands of hours perfecting their craft only to have chumps like you to come along and expect free work!! Every week there is another post just like yours. I often wonder what other services jerks like you expect to get for free? Do you go to BMW and expect a free service on your car? Do you go to resteraunts and expect free food? How many times have you seen a carpenter build a house for free in "hopes" of future work? YOU are a LOW LiFE BOTTOM!
