

NEED LICENSED HVAC CLEANING (denver)

Location Colorado https://www.genclassifieds.com/x-629271-z

I am looking for a licensed HVAC person for a mini split unit. I am purchasing a 2-3 zone mini-split unit for a new addition. My builder will do the mounting (or ready to mount), a place for the compressor etc. I am looking for an HVAC person to connect, ensure the system is charged correctly, run the control cables. An electrician will provide the electrical component. The mini split and all parts as you specify will be onsite (extra copper tubing, etc). I also am looking to install central air in my existing house
