

# Kittens (Humane Society) (Grand Island)

Location **Nebraska**  
<https://www.genclassifieds.com/x-631640-z>

My daughter has been fostering these two male kittens from the Humane Society since they were three weeks old. They were syringe fed, but now eating on their own. They are very fun, litter box trained, and very well socialized. We are trying to help the Humane Society with their placement - it would be great if these two could stay together, but it's not a requirement. If you are interested, please let me know! The adoption will happen through the Grand Island Humane.
