

Fix My Hot Tub (SW PDX)

Location **Oregon**
<https://www.genclassifieds.com/x-631987-z>

After draining my hot tub, it no longer works. The jets cut out after about 5-10 seconds or so. At first I thought I it was air in the system (and it might still be?) but I'm thinking it may actually need some repair like perhaps a faulty flow valve or?

In the past I have tried yellow page repair shops which are expensive and have been less than impressed so I'm trying CL. I live in close-in SW Portland, about three miles directly south of the city.
