

Lost Aussie (Colorado 14 between Ault and Sterling)

Location **Wyoming**
<https://www.genclassifieds.com/x-632913-z>

I lost my 6 year old Australian Shepherd mix on Saturday August 8th between Sterling and Ault. She jumped out of the back of my truck during the lightning storm. She answers to Whiskey, is microchipped and registered to me-also flagged as lost in the system- wearing an American flag bandana. She is a medium sized dog with long fairly wavy yet soft fur, a long tail, caramel colored eyes, white paws and belly although most of her fur is red. She has a spot on the top of her nose that looks like the skin was rubbed raw, and she weighs approximately 45 pounds. If you have seen her or have her, please give me a shout at the phone number above. She is in need of her shots soon so I hope someone finds her and takes her to a vet. Thank you in advance for any information leading to my finding.
