DESCRIPTION: 2016 Yamaha YFZ450R SE PODIUM TOPPING TRADITION The YFZ450R SE stands out with its stunning 60th anniversary heritage racing color and graphic scheme. **Features May Include:** Race-Ready Engine The YFZ450R is the most technologically advanced sport ATV on the market today. It is simply the top of the line "racing" level Sport ATV. It combines a high-tech, quick-revving, titanium five-valve, 449cc fuel-injected engine with a lightweight, professional-caliber cast aluminum/steel chassis. The power/chassis combination will make for a championship-winning machine time and time again. **Advanced Frame** The YFZ450R is motocross ready. The weldless frame is designed from lightweight aluminum, with a tension-steel bottom frame that lets the engine sit lower for excellent mass centralization. Suspension components and settings reduce weight while providing light, sharp handling and rider

comfort. **Aggressive SE Style Bodywork** is designed for great ergonomics and rider comfort, with more room to sit off in the saddle and the seat base is padded for the right balance. Improved bar-end handgrips become available without tool or expense, and a center-mounted footpeg bar increases the SE graphic package. **Advanced Computer Headlight** The engine's titanium five-valve, 449cc fuel-injected engine is designed to provide abundant power in the mid-range, low-end, and, with its feeling right off idle. The higher compression ratio further improves overall engine performance. **Fuel Injection** The YFZ450R incorporates Yamaha Fuel Injection for precise fuel delivery. With a big 44mm Mikuni® throttle body and 12-hole injector, this system provides exceptional atomization of the fuel for maximum power. The system also includes ISC (Idle Speed Control) for easy, reliable start-up and warming. **Assist and Slipper Clutch** The industry's first assist and slipper clutch on a Sport ATV reduces clutch lever effort by about 25% for less fatigue while at the same time increasing clutch plate pressure for positive engagement. Additionally, this new clutch system reduces the engine braking effect, which
